Report type
Individual Parent Report

Assessment version
snc-2026-1

Purpose of this report

This report summarizes one parent's understanding of the child's strengths, needs, services, routines, and co-parenting challenges. It is intended to help the parent prepare for discussions with the child's other parent, educators, healthcare providers, therapists, attorneys, or mediator. This report does not diagnose the child, determine parental fitness, establish that either parent's account is correct, or replace professional or legal advice.

1. Report at a Glance

Child's identified strengths

- Curious.
- Kind to animals.
- Loves to draw.

Child's primary needs

- ADHD or executive functioning
- Anxiety or emotional regulation
- Sensory processing

Parent's highest priorities

- 1.
- Consistent routine
- 2.

Areas of established strength

-

Areas needing greater coordination

- Medical and Mental Healthcare
- Kindergarten and Elementary School
- Transitions, Pickup, and Drop-Off
- Daily Routines Across Homes

Priority concerns

- No priority concerns identified

Professional questions requiring clarification

- Updated therapy summary from OT.

2. Category Summary

Understanding and Acceptance

Score: 3.88 · Generally supported

Parent reports a mostly strong understanding with some unresolved questions.

Medical and Mental Healthcare

Score: 3.22 · Coordination opportunity

Medical information does not always reach both homes in time.

Kindergarten and Elementary School

Score: 2.90 · Coordination opportunity

Classroom coordination is inconsistent.

Transitions, Pickup, and Drop-Off

Score: 3.00 · Coordination opportunity

Transitions are a recurring source of stress.

Daily Routines Across Homes

Score: 2.92 · Coordination opportunity

Daily-care consistency is uneven.

Communication and Information Sharing

Score: 3.50 · Generally supported

Communication is largely reliable with occasional gaps.

Special School Events

Score: 3.62 · Generally supported

Events mostly go smoothly.

Extracurricular Activities

Score: 3.60 · Generally supported

Activities generally run smoothly with a few gaps.

Decision-Making and Professional Guidance

Score: 3.71 · Generally supported

Most decisions get made, though the process is ad-hoc.

Parent Capacity and Support

Score: 4.10 · Generally supported

Capacity is generally sufficient with some barriers.

Safety considerations

Score: Not scored · Separate review

No safety concerns disclosed.

Scores reflect the reporting parent's answers and are not findings of fact.

3. Child Profile

Age and grade

9 years, 4th grade

Diagnosis status

Diagnosis or eligibility determination received

Identified areas of need

- ADHD or executive functioning
- Anxiety or emotional regulation
- Sensory processing

Strengths

Curious. Kind to animals. Loves to draw.

Interests and sources of enjoyment

Building LEGO, swimming, our family dog.

Parent's narrative

ADHD affects focus and mornings; anxiety around transitions.

Report summary

According to this parent, the child demonstrates strengths in Curious. The parent identifies the child's primary support needs as ADHD or executive functioning, Anxiety or emotional regulation, Sensory processing. The parent reports that Diagnosis or eligibility determination received.

4. Understanding and Acceptance

Generally supported · Score 3.88

Finding

Parent reports a mostly strong understanding with some unresolved questions.

Child impact

Small knowledge gaps can lead to different responses in each home.

Suggested option

Identify the one or two areas you feel least certain about and get them clarified in writing.

First action step

Book a 30-minute consult with the diagnosing or treating professional.

5. Medical and Mental Healthcare

Coordination opportunity · Score 3.22

Finding

Medical information does not always reach both homes in time.

Child impact

Delayed information can affect medication timing and appointment attendance.

Suggested option

Establish a written provider contact + appointment sharing procedure.

First action step

Draft a shared provider contact list this week.

Additional detail from this parent

6. Kindergarten and Elementary School

Coordination opportunity · Score 2.90

Finding

Classroom coordination is inconsistent.

Child impact

Academic support in one home may not reach the other.

Suggested option

Request a joint parent-teacher meeting.

First action step

Contact the teacher to schedule a joint meeting.

Additional detail from this parent

Changes:

7. Transitions, Pickup, and Drop-Off

Coordination opportunity · Score 3.00

Finding

Transitions are a recurring source of stress.

Child impact

The child may show dysregulation before or after exchanges.

Suggested option

Move exchanges to a neutral or school-based location.

First action step

Propose a neutral exchange location to the other parent.

8. Daily Routines Across Homes

Coordination opportunity · Score 2.92

Finding

Daily-care consistency is uneven.

Child impact

Transitions and behaviour may be affected.

Suggested option

Post a visible daily rhythm in both homes.

First action step

Print a rhythm sheet by Friday.

9. Communication and Information Sharing

Generally supported · Score 3.50

Finding

Communication is largely reliable with occasional gaps.

Child impact

Occasional gaps still create surprises.

Suggested option

Add a weekly 10-minute child-focused check-in.

First action step

Propose a fixed day/time to the other parent.

Additional detail from this parent

Preferred

- Co-parenting application
- Email

10. School Events

Generally supported · Score 3.62

Finding

Events mostly go smoothly.

Child impact

Occasional friction can spill over onto the child.

Suggested option

Keep a shared events calendar.

First action step

Set up (or update) a shared calendar this week.

Additional detail from this parent

Context li

- Parent-teacher conferences
- IEP or Section 504 meetings

10. Extracurricular Activities

Generally supported · Score 3.60

Finding

Activities generally run smoothly with a few gaps.

Child impact

Small gaps (uniform, ride) can leave the child unsupported.

Suggested option

Standardise transport + uniform ownership.

First action step

Write the who-does-what plan and share it.

11. Decision-Making and Professional Guidance

Generally supported · Score 3.71

Finding

Most decisions get made, though the process is ad-hoc.

Child impact

Occasional stalls delay the child's care.

Suggested option

Adopt a written decision ladder (records ? professional input ? mediation).

First action step

Draft the ladder and propose it to the other parent.

Additional detail from this parent

Supports

- Neutral child therapist
- Educational meeting with teachers or school specialists

12. Family Violence and Communication Safety

Safety-screen result

No safety concerns disclosed.

Reported items

- None of these apply.

Sensitive safety answers are never included in a report shared with the other parent. This section is only visible in your own report.

13. Parent Capacity and Support

Generally supported · Score 4.10

Finding

Capacity is generally sufficient with some barriers.

Child impact

Barriers can affect follow-through on the plan.

Suggested option

Identify the single biggest barrier and address it first.

First action step

Ask one trusted person to help with that barrier.

14. Parent's Goals, Concerns, and Priorities

Three primary goals

- 1.
- Consistent routine
- 2.

Three primary concerns

- 1.
- Missed medication
- 2.

What the child needs from this parent

Predictability and patience.

What the child needs from the other parent (this parent's perspective)

Follow the shared routine and IEP.

What the child needs from both parents

Keep the child out of adult disagreements.

Which issue should be addressed first

A shared medication + school communication process.

Professional information still needed

Updated therapy summary from OT.

30-day agreement worth trying

Try a shared parenting app for 30 days.

15. Recommended Child-Focused Action Plan

Priority 1

Action: R

Priority 2

Action: P

Priority 3

Action: M

Priority 4

Action: E

Recommended 30-day steps

- Draft a shared provider contact list this week.
- Contact the teacher to schedule a joint meeting.
- Propose a neutral exchange location to the other parent.
- Print a rhythm sheet by Friday.

16. Questions for the Other Parent or a Professional

- What medication schedule has the provider recommended?
- Which routines are essential in both homes?
- How will each parent receive school notices?
- What items must accompany the child during exchanges?
- Who will schedule and attend appointments?
- How will appointment summaries be shared?
- What should happen when the parents disagree about treatment?
- Which professional is best qualified to answer the disputed question?
- How could we align on: 'Both parents can access appropriate medical records.'
- How could we align on: 'Medication changes and side effects are promptly shared.'
- How could we align on: 'The parents have a workable process for resolving disagreements about treatment.'
- How could we align on: 'Homework and reading expectations are reasonably consistent between homes.'
- How could we align on: 'School supplies, technology, medication, and assistive devices travel reliably between homes.'
- How could we align on: 'Teachers receive consistent and accurate information from the parents.'
- How could we align on: 'Educational disagreements are handled without placing the child or school staff in the middle.'
- How could we align on: 'Necessary medication, schoolwork, clothing, comfort items, and equipment accompany the child.'

17. Closing Summary

Based on this parent's responses, the child's primary strengths include Curious, and the child's principal support needs involve ADHD or executive functioning, Anxiety or emotional regulation, Sensory processing. The parent reports established strengths in - and identifies a need for greater coordination in Medical and Mental Healthcare, Kindergarten and Elementary School, Transitions, Pickup, and Drop-Off, Daily Routines Across Homes. The most immediate child-focused priorities are -.

Parent reflection

One thing

One issue that requires cooperation:

-

One question that requires professional guidance:

-

This Individual Parent Report is an educational reflection tool from SA CoParents. It does not diagnose the child, determine parental fitness, establish that either parent's account is correct, or replace professional or legal advice. Scores reflect the reporting parent's answers and are not findings of fact.
