Report type

Individual Parent Report

Assessment version

snc-2026-1

Purpose of this report

This report summarizes one parent's understanding of the child's strengths, needs, services, routines, and co-parenting challenges. It is intended to help the parent prepare for discussions with the child's other parent, educators, healthcare providers, therapists, attorneys, or mediator. This report does not diagnose the child, determine parental fitness, establish that either parent's account is correct, or replace professional or legal advice.

1. Report at a Glance

Child's identified strengths

- Curious.
- Kind.
- Loves dinosaurs and drawing.

Child's primary needs

- ADHD or executive functioning
- Sensory processing

Parent's highest priorities

- Consistent bedtime
- shared homework routine
- regular OT.

Areas of established strength

- Kindergarten and Elementary School

Areas needing greater coordination

- Medical and Mental Healthcare
- Decision-Making and Professional Guidance

Priority concerns

- Communication and Information Sharing

Professional questions requiring clarification

- Should the ADHD medication dose be adjusted for growth?

2. Category Summary

Understanding and Acceptance

Score: 4.00 · Generally supported

Parent reports a mostly strong understanding with some unresolved questions.

Medical and Mental Healthcare

Score: 3.00 · Coordination opportunity

Medical information does not always reach both homes in time.

Kindergarten and Elementary School

Score: 5.00 · Established strength

Educational coordination is strong.

Transitions, Pickup, and Drop-Off

Score: 2.00 · Significant inconsistency

Exchanges are conflict-prone.

Daily Routines Across Homes

Score: 4.00 · Generally supported

Most routines are consistent with some drift.

Communication and Information Sharing

Score: 1.00 · Priority concern

Communication is a recurring blocker.

Special School Events

Score: 4.00 · Generally supported

Events mostly go smoothly.

Extracurricular Activities

Score: 4.00 · Generally supported

Activities generally run smoothly with a few gaps.

Decision-Making and Professional Guidance

Score: 3.00 · Coordination opportunity

Decision-making sometimes stalls.

Parent Capacity and Support

Score: 4.00 · Generally supported

Capacity is generally sufficient with some barriers.

Safety considerations

Score: Not scored · Separate review

No safety concerns disclosed.

Scores reflect the reporting parent's answers and are not findings of fact.

3. Child Profile

Age and grade

8 years / 3rd grade

Diagnosis status

Diagnosis or eligibility determination received

Identified areas of need

- ADHD or executive functioning
- Sensory processing

Strengths

Curious. Kind. Loves dinosaurs and drawing.

Interests and sources of enjoyment

Drawing, biking, reading with mom, dinosaur books.

Parent's narrative

ADHD-Combined type; ongoing occupational therapy for sensory regulation. Bilingual English/Spanish household.

Report summary

According to this parent, the child demonstrates strengths in Curious. The parent identifies the child's primary support needs as ADHD or executive functioning, Sensory processing. The parent reports that Diagnosis or eligibility determination received.

4. Understanding and Acceptance

Generally supported · Score 4.00

Finding

Parent reports a mostly strong understanding with some unresolved questions.

Child impact

Small knowledge gaps can lead to different responses in each home.

Suggested option

Identify the one or two areas you feel least certain about and get them clarified in writing.

First action step

Book a 30-minute consult with the diagnosing or treating professional.

5. Medical and Mental Healthcare

Coordination opportunity · Score 3.00

Finding

Medical information does not always reach both homes in time.

Child impact

Delayed information can affect medication timing and appointment attendance.

Suggested option

Establish a written provider contact + appointment sharing procedure.

First action step

Draft a shared provider contact list this week.

Additional detail from this parent

Providers

- Pediatrician
- Occupational therapist
- Psychiatrist

6. Kindergarten and Elementary School

Established strength · Score 5.00

Finding

Educational coordination is strong.

Child impact

Learning support flows smoothly across homes.

Suggested option

Keep both parents on the school's official contact list.

First action step

Verify contact list at the next parent-teacher meeting.

Additional detail from this parent

School na

Supports:

- Individualized Education Program (IEP)
- Classroom accommodations

Primary concern:

Homeworl

7. Transitions, Pickup, and Drop-Off

Significant inconsistency · Score 2.00

Finding

Exchanges are conflict-prone.

Child impact

The child witnesses recurring adult tension.

Suggested option

Consider curbside or school-based exchanges.

First action step

Draft the new exchange plan and send it in writing.

Additional detail from this parent

OT senso

Checklist wanted:

Yes

8. Daily Routines Across Homes

Generally supported · Score 4.00

Finding

Most routines are consistent with some drift.

Child impact

Small drifts add up for a sensitive child.

Suggested option

Pick one anchor routine and hold it identical for 30 days.

First action step

Choose bedtime as the anchor and confirm times.

Additional detail from this parent

Essential

Flexibility:

Weekend

Routine grid:

Medicatio

9. Communication and Information Sharing

Priority concern · Score 1.00

Finding

Communication is a recurring blocker.

Child impact

Coordination for the child may be failing.

Suggested option

Consider working with a Parenting Facilitator.

First action step

Ask your attorney/mediator for a referral.

Additional detail from this parent

Preferred

- Co-parenting application
- Email

10. School Events

Generally supported · Score 4.00

Finding

Events mostly go smoothly.

Child impact

Occasional friction can spill over onto the child.

Suggested option

Keep a shared events calendar.

First action step

Set up (or update) a shared calendar this week.

Additional detail from this parent

10. Extracurricular Activities

Generally supported · Score 4.00

Finding

Activities generally run smoothly with a few gaps.

Child impact

Small gaps (uniform, ride) can leave the child unsupported.

Suggested option

Standardise transport + uniform ownership.

First action step

Write the who-does-what plan and share it.

Additional detail from this parent

11. Decision-Making and Professional Guidance

Coordination opportunity · Score 3.00

Finding

Decision-making sometimes stalls.

Child impact

Care catches up slowly.

Suggested option

Set a deadline for each open decision.

First action step

List the currently-open decisions and their deadlines.

Additional detail from this parent

12. Family Violence and Communication Safety

Safety-screen result

No safety concerns disclosed.

Reported items

- None of these apply.

Sensitive safety answers are never included in a report shared with the other parent. This section is only visible in your own report.

13. Parent Capacity and Support

Generally supported · Score 4.00

Finding

Capacity is generally sufficient with some barriers.

Child impact

Barriers can affect follow-through on the plan.

Suggested option

Identify the single biggest barrier and address it first.

First action step

Ask one trusted person to help with that barrier.

Additional detail from this parent

14. Parent's Goals, Concerns, and Priorities

Three primary goals

- Consistent bedtime
- shared homework routine
- regular OT.

Three primary concerns

- Homework meltdowns
- medication timing on Fridays
- missed school notices.

What the child needs from this parent

Predictable evenings and one-on-one time.

What the child needs from the other parent (this parent's perspective)

Same medication schedule; consistent homework routine.

What the child needs from both parents

Consistent bedtime and calm exchanges.

Which issue should be addressed first

Homework routine on transition nights.

Professional information still needed

Should the ADHD medication dose be adjusted for growth?

30-day agreement worth trying

Try the shared parenting app for 30 days.

15. Recommended Child-Focused Action Plan

Priority 1

Action: C

Priority 2

Action: C

Priority 3

Action: E

Priority 4

Action: S

Recommended 30-day steps

- Draft a shared provider contact list this week.
- Draft the new exchange plan and send it in writing.
- Ask your attorney/mediator for a referral.
- List the currently-open decisions and their deadlines.

16. Questions for the Other Parent or a Professional

- What medication schedule has the provider recommended?
- Which routines are essential in both homes?
- How will each parent receive school notices?
- What items must accompany the child during exchanges?
- Who will schedule and attend appointments?
- How will appointment summaries be shared?
- What should happen when the parents disagree about treatment?
- Which professional is best qualified to answer the disputed question?
- How could we align on: 'My child understands the parenting-time schedule.'
- How could we align on: 'Pickup and drop-off times are predictable.'
- How could we align on: 'Necessary medication, schoolwork, clothing, comfort items, and equipment accompany

the child.'

- How could we align on: 'Schedule changes are communicated early enough to support the child.'
- How could we align on: 'Exchanges occur without exposing the child to conflict.'
- How could we align on: 'Each parent understands the child's transition-related triggers.'
- How could we align on: 'The child receives appropriate preparation before changing homes.'
- How could we align on: 'Both homes support calming or decompression time after transitions.'

17. Closing Summary

Based on this parent's responses, the child's primary strengths include Curious, and the child's principal support needs involve ADHD or executive functioning, Sensory processing. The parent reports established strengths in Kindergarten and Elementary School and identifies a need for greater coordination in Medical and Mental Healthcare, Transitions, Pickup, and Drop-Off, Communication and Information Sharing, Decision-Making and Professional Guidance. The most immediate child-focused priorities are Communication and Information Sharing.

Parent reflection

One thing

One issue that requires cooperation:

-

One question that requires professional guidance:

-

This Individual Parent Report is an educational reflection tool from SA CoParents. It does not diagnose the child, determine parental fitness, establish that either parent's account is correct, or replace professional or legal advice. Scores reflect the reporting parent's answers and are not findings of fact.
